Work experience

Nov 2021 - Present

Junior Full Stack developer at Rodeapps
As a full stack developer, I am part of the entire development lifecycle of the Rapidonkey project. I work in an Agile environment, alongside a team of up to five developers. We ensure our team produces high quality results through extensive reviews and testing.

For the Backend, I used Spring Boot to:
- Create and document RESTful API endpoints
- Implement and test microservices
- Build and Interact with the Database using Spring Data JPA

Tech stack: Git, Spring Boot Framework, Hibernate, Spring Data JPA, Java, MySQL, Flyway, Mockito, Cucumber, Postman.

As for the Frontend:
- I worked with both Angular and React to build responsive, intuitive interfaces for our users' delight

Tech stack: Git, Angular, React, Javascript, Typescript, CSS, HTML, MomentJS

Education

Babeș-Bolyai University Cluj-Napoca (2020 - 2023)
Faculty of Mathematics and Computer Science, Mathematics and Computer Science specialization.

Some of my work

- Scoalameadegermana: Main frontend developer on a fresh new codebase in React. With SEO aspects in mind, mobile responsiveness and cross-browser compatibility was the main talk throughout the development process.
- Detergentiprofesionali: Did frontend work in Angular including design, implementation and testing, mainly mobile responsiveness. I also did some SEO research and work.
- Memo app: React application I use for shopping.
- Decorations app: Another React application.
- Tindino: A website made using Bootstrap5
